SUMMARY

Final-year Computer Science student and self-taught full-stack developer with hands-on experience delivering live client projects on the MERN stack and Java. Founded and ran a web development venture (Bugbie), managing everything from architecture to client communication. Comfortable working independently and shipping production-ready web applications end to end.

EDUCATION

Allenhouse Institute of Technology, Kanpur

B.Tech — Computer Science and Engineering

Degree Completion: 2026

EXPERIENCE

Founder — Bugbie

Website: bugbie.com

- Founded and led a web development venture, taking client projects from requirements to deployment.
- Owned the full development lifecycle — architecture, coding, deployment, and client communication.
- Delivered multiple production websites for real clients, focused on performance and reliability.

MERN & Java Intern — UptoSkills

Nov 2025 – Jan 2026

- Worked across the MERN stack and Java full-stack development.
- Built REST APIs, managed databases, and integrated frontend systems.

Java Intern — CODSOFT

Mar 2025 – May 2025

- Developed Java applications using OOP principles and core data structures.
- Used Git and GitHub for version control and team collaboration.

PROJECTS

Alhadiautoparts.com Client Project

Live: alhadiautoparts.com

- Developed a responsive automotive parts catalog using React, Vite, and Tailwind CSS.
- Architected a RESTful API with Node.js, Express, and MongoDB to handle product inventory, contact forms, and file uploads.
- Built a secure, standalone admin dashboard with API key authentication, enabling non-technical users to manage database records in real-time.

Solxcel.com Client Project

Live: solxcel.com

- Developed a business web platform to digitally showcase solar products and services, leveraging Next.js, React, and MongoDB for a full-stack architecture.
- Added custom UI animations and a robust contact system for lead generation.
- Boosted customer engagement with a modern, fast, and mobile-friendly UI.

SmartDine — Restaurant Booking App

React, Node.js, MongoDB, Socket.IO

Live: smart-table-neon.vercel.app | GitHub: github.com/FaizanKhan8896/SmartDine

- Developed a full-stack booking platform with real-time table tracking and role-based access for diners, partners, and admins.
- Created an interactive, premium UI utilizing Tailwind CSS, Framer Motion, and 3D web elements.

Movie Recommendation System

Python, FastAPI, Scikit-learn, JS

Live: movie-recommender-vert-nine.vercel.app | GitHub: github.com/FaizanKhan8896/MovieRecommendationSystem

- Built a fast, full-stack web application using FastAPI and JavaScript to search and discover movies.
- Integrated a machine learning recommendation engine using Scikit-learn and Pandas to compute TF-IDF cosine similarity scores based on movie genres and plot descriptions.
- Designed a visually striking frontend with custom CSS Glassmorphism, 3D animations, and debounced instant-search functionality.

SKILLS

Languages: Java, JavaScript, Python

Web: HTML, CSS, React.js, Node.js, Express.js

Libraries: Pandas, NumPy, Matplotlib

Database: MongoDB, MySQL

Other: Git, GitHub, Leadership, Problem Solving, Teamwork, Communication

ACHIEVEMENTS

- Gold Medal — Robowar Competition
- 2nd Position — Table Tennis (AKTU)
- Participated in Codesaga, Battle with Bytes
- India AI Impact Buildathon Participant
